

DANISH HAKIM

☎ 604-786-6647 ✉ danhakim006@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

Education

University of British Columbia

Bachelor of Applied Science | Minor in Computer Science | Presidential Scholar

Vancouver, BC

Sept. 2022 – May 2027

Experience

TELUS Health

Toronto, ON

Software Engineering Intern

Jan 2026 – Present

- Owned end-to-end development of a **Python** serverless backend on **AWS Lambda** behind an **API Gateway** REST interface, orchestrating async service-to-service calls to automate patient health-monitoring phone interviews across **1,000+** interactions, reducing manual customer service calls by **80%**.
- Engineered an **ETL service** parsing XML monitoring plans from a clinical **REST API** into a structured interview schema, backed by a **DynamoDB** state machine tracking multi-step interview progress across **300** daily calls.
- Building a **Predictive Analytics Tool** to surface early health risk signals by aggregating temporal patient data and generating alerts to support proactive clinician intervention.

TELUS – AI Accelerator

Vancouver, BC

Software and ML Engineering Intern

May 2025 – Dec 2025

- Architected a production-grade **Model-Based Reinforcement Learning** system modeling building thermodynamics as a Markov Decision Process, projected to reduce HVAC energy consumption by **20% per site** and save **\$450K**.
- Replaced legacy **PHP** and **Shell** tooling with a **Python microservice** enabling asynchronous SNMP device control, structured logging, and secure remote execution, reducing system downtime by **30%**.
- Built geospatial analytics workflows using **SQL** and **BigQuery** to analyze Google Places data, mapping proximity between TELUS infrastructure and surrounding businesses to support retail and network planning decisions.

Fennec.AI

Vancouver, BC

Data Analyst – FP&A (Part-time)

Sep. 2024 – Apr 2025

- Built financial forecasting models in **Python** that supported a **\$300K** pre-seed raise at a **\$10M valuation**, used directly in investor and VC pitch decks.
- Automated KPI tracking workflows using **SQL** and **MS Excel**, reducing manual reporting effort by **70%** for founders.
- Translated product constraints into scenario-driven revenue projections improving forecast accuracy by **25%**.

UBC BioProducts Institute

Vancouver, BC

Bioengineering Intern

May 2024 – Aug 2024

- Built quantitative analysis pipelines in **Python** and **R** for tensile strength, optical transmission, and mechanical modeling; achieved **35%** higher strength and **1.1%** transparency improvement over baseline.
- Presented research at **ACS Spring 2025 Conference** (13,000+ attendees) and selected for the competitive **Sci-Mix session** for outstanding abstracts.

Projects

MindTap – Simon Cox Design Competition 2026, Innovation Award | [Demo](#)

EEG | Python | ML

- Co-led development of an EEG-powered assistive headset enabling individuals with physical disabilities to control smartphones using brain signals, translating neural activity into real-time commands for messaging and app navigation.
- Designed and iterated on the signal processing and ML pipeline to filter and classify noisy multichannel EEG data, detecting intentional mental patterns and mapping them to smartphone actions through a custom interface.

SteadyScript – nwHacks 2026 Winner | [Code](#) | [Demo](#)

React | OpenCV | Python | TypeScript | Vite

- Built a real-time tremor analysis system that tracks fine-grained hand motion from webcam input and quantifies involuntary jitter during drawing tasks, with live visual feedback for motor control assessment.

Therassist | [Code](#)

Python | FastAPI | Whisper | OpenCV | TensorFlow

- Built a multimodal therapy screening platform that analyzes facial emotion and speech from live sessions and generates structured ML-driven summaries to support therapist workflows.

Technical Skills

Languages: Python, Java, C, C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS, R, PHP

Backend & Cloud: AWS Lambda, API Gateway, DynamoDB, AWS Secrets Manager, VPC, Google Cloud Platform, BigQuery, Docker

Frameworks & Libraries: FastAPI, Flask-RESTX, pandas, NumPy, TensorFlow, Scikit-learn, OpenCV, Matplotlib

Developer Tools: Git, VS Code, IntelliJ, Jira
