Education

University of British Columbia

Bachelor of Applied Science | Minor in Computer Science | Presidential Scholar

Vancouver, BC

Sept. 2022 – May 2027

Experience

TELUS Health

Toronto, ON

Software Engineering Intern

Jan 2026 – Present

- Owning the end-to-end development of an automated **AI phone assistant** using **Twilio Voice webhooks**, reducing required manual customer service calls by **80%** through automated patient engagement and response triaging.
- Built a serverless event-driven backend using **AWS Lambda** and **DynamoDB** to ingest call events, process speech responses, and store structured longitudinal interaction data.
- Building a **predictive analytics tool** to surface early health risk signals by aggregating temporal patient data and generating alerts to support proactive clinician intervention.

TELUS - AI Accelerator

Vancouver, BC

Software and ML Engineering Intern

May 2025 – Dec 2025

- Architected a production-grade **Model-Based Reinforcement Learning** system modeling building thermodynamics as a Markov Decision Process, projected to reduce HVAC energy consumption by **20% per site** and save **\$450K across 1.4 years**.
- Replaced legacy **PHP** and **shell** tooling with a **Python microservice** enabling asynchronous SNMP device control, structured logging, and secure remote execution, reducing system downtime by **30%**.
- Built geospatial analytics workflows using **SQL** and **BigQuery** to analyze Google Places data, mapping proximity between TELUS infrastructure and surrounding businesses to support retail and network planning decisions.

Fennec.AI

Vancouver, BC

FP&A Analyst (Part-time)

Sep. 2024 – Apr. 2025

- Built financial forecasting models in **Python** that supported a **\$300K** pre-seed raise at a **\$10M valuation**, used directly in investor and VC pitch decks.
- Automated KPI tracking workflows using **SQL** and **MS Excel**, reducing manual reporting effort by **70%** for founders.
- Translated product constraints into scenario-driven revenue projections improving forecast accuracy by **25%**.

UBC BioProducts Institute

Vancouver, BC

Material Analysis & Bioengineering Research Intern

May 2024 – Apr. 2025

- Built quantitative analysis pipelines in **Python** and **R** for tensile strength, optical transmission, and mechanical modeling; achieved **35%** higher strength and **1.1%** transparency improvement over baseline.
- Presented research at **ACS Spring 2025 Conference** (13,000+ attendees) and selected for the competitive **Sci-Mix session** for outstanding abstracts.

Projects

SteadyScript – nwHacks 2026 Winner | [Code](#) | [Demo](#)

React | OpenCV | Python | TypeScript | Vite

- Built a real-time tremor analysis system that tracks fine-grained hand motion from webcam input and quantifies involuntary jitter during drawing tasks, with live visual feedback for motor control assessment.

Therassist | [Code](#)

Python | FastAPI | Whisper | OpenCV | TensorFlow

- Built a multimodal therapy screening platform that analyzes facial emotion and speech from live sessions and generates structured ML-driven summaries to support therapist workflows.

PhishNet.AI | [Code](#)

SVC | Flask-RESTX | Scikit-learn | Python | TF-IDF

- Built a production-style phishing detection service that classifies malicious emails with high accuracy and exposes real-time inference through an API.

Technical Skills

Languages: Java, Python, C, C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS, R, PHP

Developer Tools: Git, Docker, AWS, Google Cloud Platform, VS code, BigQuery, IntelliJ, Jira

Libraries/Frameworks: FastAPI, Flask-RESTX, pandas, NumPy, OpenCV, Matplotlib, TensorFlow, Scikit-learn
